Product specification

Article name: Kürbiskernmus

Information for the Customer

Being a product of nature, the nutritional values in foods can vary depending on origin, growth conditions and processing. Nutritional values mentioned in this specification are based on information from the supplier and/or from the NEVO table <http://nevo-online.rivm.nl/>. Parameters not listed are unknown according to the NEVO table.

Product description

Pumpkin seeds (*Cucurbita moschata*), grown without shell. The product is re-cleaned in The Netherlands. Pumpkin seeds are an excellent source of vitamin E and Zinc. A 100% natural product, characterized by its green color.

Product characteristics

EU legislation applies for pesticides, heavy metals and toxins (aflatoxin, ochratoxin).
FFA: <2,0%

Menu suggestion

Intended use: pumpkin seeds can be used as decoration or as an ingredient in a wide range of foods (human consumption). Processing and/or reselling for purposes other than 'intended' use and/or discarding preparation instructions excludes the responsibility and liability of Yme Kuiper B.V.

Dosage

There are no restrictions on the acceptable daily intake (ADI) for this product.

Preparation instructions

Pumpkin seeds can be consumed both processed as unprocessed.

Disclaimer

Despite intensive cleaning and inspection performed in the country of origin and in our own country, impurities can not entirely be ruled out. We declare that the ingredients listed in this specification are not genetically modified; described according to (EC) No.: 1829/2003 and 1830/2003.

Instructions for use

Process data

Sieved	Yes	
	Particle size in mm	
	Comment	Product is during processing through extended sieves package cleaned and sorted.
Metal detection	Yes	
	Comment	Detection is carried out magnet and by Sesotec Rapid 4000/120 metaldetector for free-fall applications. Small magnetic field, high sensibility
	Particle size for Fe in mm	0.60
	Particle size for non-Fe in mm	0.60
	Particle size for stainless steel in mm	0.90
	Stainless steel	NA
Irradiated	No	
Thawed	No	
Other detection forms	X rayed by BEST / TOMRA IXUS (ceramic 2.0 mm/ glass 2.0 mm/ stainless 316 1.0 mm) Sortex cleaned by ASM colorsorter F5 2.0	

Shelf life data

Time unit for expiration date	Month
Minimum shelf life after production	12
Minimum shelf life after delivery	4
Storage conditions	Cool, dry, dark
Maximum temperature °C	18
Elaboration on storage conditions	Shelf life of 12 months after production when stored at max. 18 °C and max. 60 % RH. Storage above the maximum temperature is harmful to the product. It can result in build up of fungus, larvae and/or moths, which excludes the responsibility and liability of the supplier.
Storage conditions during transport	Uncooled
Modified Atmosphere Packaging (MAP)	No
